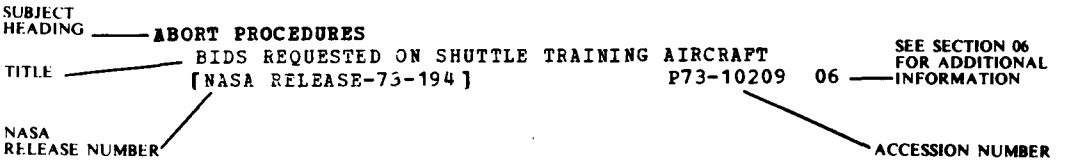
INTRODUCTION

This issue of the *Index to NASA News Releases and Speeches* contains a listing of news releases distributed by the Office of Public Affairs, NASA Headquarters, and a selected listing of speeches presented by members of the Headquarters staff during 1973. This *Index* supplements the previous issues that were identified as *Index to NASA News Releases and Speeches 1963-1966*, and the Supplements for 1967 through 1972.

The *Index* is arranged in six sections—Subject Index, Personal Names Index, News Release Number Index, Accession Number Index, Speeches, and News Releases.

Section 1 (Subject Index) contains subject headings arranged alphabetically that describe the contents of the items indexed. Under each heading, the user will find references, as applicable, to Speeches (05 for Section 5) and News Releases (06 for Section 6) containing information on that subject entry, and in many cases, cross-references to related subject headings.

An example of an entry from the Subject Index follows:



Two types of cross-references are used:

A) S for "SEE" directs the user to a subject heading where references can be found, e.g.,

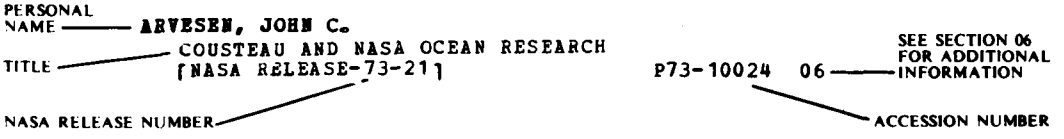
COMSAT
S COMMUNICATIONS SATELLITE CORP.

B) SA for "SEE ALSO" directs the user to related subject headings where additional references may be found, e.g.,

COMMUNICATION SATELLITES
SA TELESAT SATELLITES

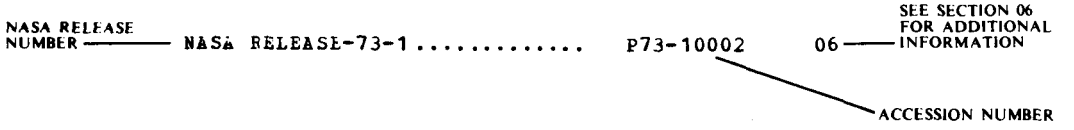
Section 2 (Personal Names Index) contains personal names arranged alphabetically that identify the persons mentioned in the items indexed or, in the cases of speeches, the persons that made the speeches.

An example of an entry from the Personal Names Index follows:



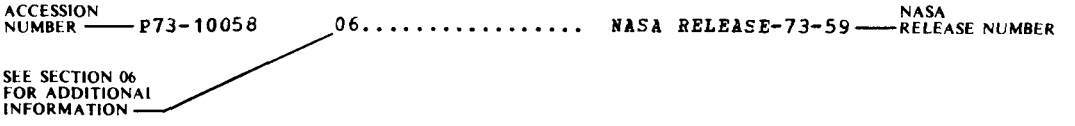
As indicated in the examples, each index entry in Sections 1 and 2 contains the title, accession number, and reference section.

Section 3 (News Release Number Index) lists all numbered NASA News Releases in numerical order with the corresponding accession numbers. An example of the News Release Number Index follows:



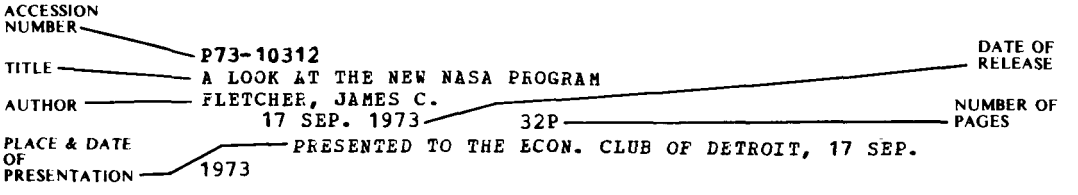
Section 4 (Accession Number Index) lists all items by accession number in numerical order with the corresponding reference section (05 for Speeches, 06 for News Releases), in which the item is described in detail, and the news release number, if any.

An example of the Accession Number Index follows:



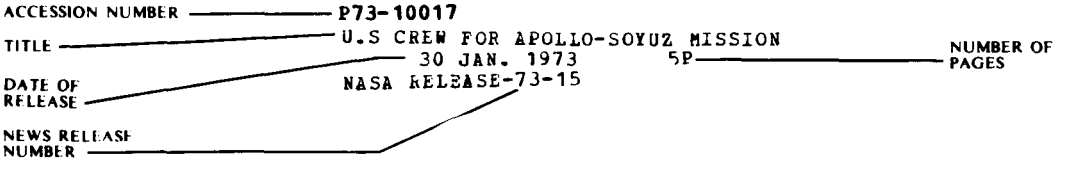
Section 5 (Speeches) lists the speeches indexed in this publication, arranged in accession number order. Each entry contains the title of speech, speaker, date and occasion of presentation, and other reference information.

An example of an entry from the Speeches listing follows:



Section 6 (News Releases) lists the news releases, press briefings, news conference transcripts, and other public information releases indexed in this publication, arranged in accession number order. Each news release item contains the title, date of release, News Release Number (if any), and other reference information.

An example of an entry from the News Releases listing follows:



The contents of this index were printed by computer. This necessitates, in certain instances, the substitution of computer symbols for the more familiar printed symbols. These include the use of * for ',/Ques/ for ?, and - for :. The symbols < and > immediately before and after the title of the entry tell the user that the entry was originally untitled and that a title was created by the compilers of the index. Finally, in Section 2—the Personal Names Index—the symbol + is used to identify speeches presented by the person under whose name they are indexed.

Copies of documents cited in this index are available to NASA offices on request from the NASA Scientific and Technical Information Facility, P.O. Box 33, College Park, Maryland, 20740. Requests for copies of the index itself should be addressed to the Scientific and Technical Information Office, Code KSI, National Aeronautics and Space Administration, Washington, D.C. 20546.

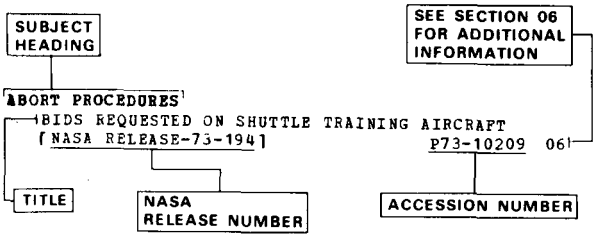
INDEX TO NASA NEWS RELEASES AND SPEECHES (1973 Supplement)

March 1974

Typical Subject Index Entry



The title of the news release or speech is used as the prime retrieval point. The accesion number, e.g., P73-10209, is located under and to the right of the title and is followed by a two-digit number, e.g., 06, which designates the reference section of this index containing the complete citation.

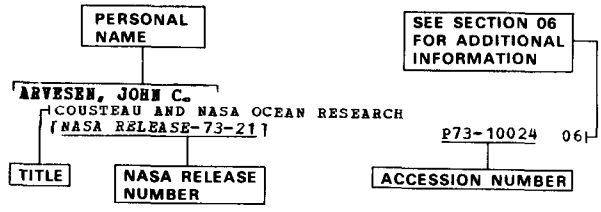
INDEX TO NASA NEWS RELEASES AND SPEECHES (1973 Supplement)

March 1974

Typical Personal Names Index Entry



The title of each news release or speech appears under each name mentioned in the news releases and speeches whether or not the individual is the speaker. When the name refers to the speaker, this fact is indicated with a + to the left of the title. The NASA accession number is located under and to the right of the title of the speech, e.g., P73-10024, followed by a two-digit number, e.g., 06, which identifies the section containing the complete entry.

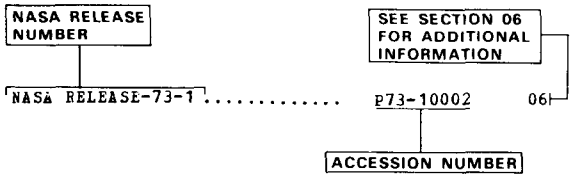
INDEX TO NASA NEWS RELEASES AND SPEECHES (1973 Supplement)

March 1974

Typical News Release Number Index Entry



The index correlates each news release number with its corresponding accession number, e.g., P73-10002. Following the accession number is a two-digit number, e.g., 06, which designates the reference section containing the complete citation. News release numbers that were assigned but not used have been omitted from this listing.
